Smart Door-Lock sensor
Designed for monitoring individual's safety and well being

The Smart Door-Lock sensor not only monitors door access / entry but also can act as a "panic / alert notification" device through it's integrated into the Portal. You are able to set specific alarms/notifications on any/all of the reported sensor readings.

These notifications as well as reporting can go out as email, text message or phone alert.

Door Lock Attributes:

Entry by:

- **Use NFC key**
- **Use Finger Print ID**
- **Use Key Pad**

Monitor:

- **Entry/Exit times of day**
- **Unauthorized entry**

All systems are pre-configured, tested and shipped ready to be plug-n-play. During setup are support staff are on-line to facilitate and answer any of your questions.
