

Portal Sensor Hub(s)

Designed for ease of use / maintenance free

The Portal is designed to bring together data / information collected from various sensors and/or devices to do this we have partnered with a 3rd party vendor to implement their hub into our Portal services, "Sensor Hub". This is required for all Portal accounts that have sensors integrated, while if the client ONLY has the Smart Bio-Watch – they will ONLY need the "Smart Bio-Watch Hub". The Smart-Bio-Watch comes "bundled" with its hub. While the Sensor Hub is purchased separately. Both simply plug into the existing Internet router (RJ45 provided) and a 110 outlet.

Sensor Hub:

- Required for Sensor connectivity / management
- Purchased separately
- 3 year warranty

Sensor Hub

Smart Bio-Watch Hub:

- Comes bundled with the Smart Bio-Watch
- 3 year warranty

Smart Bio-Watch Hub

All systems are pre-configured, tested and shipped ready to be plug-n-play. During setup our support staff are on-line to facilitate and answer any of your questions. **Contact us: Sales@WareHouse-13.biz**
