<b>Customer Name:</b>	East Coast Farmacies	<b>Sample Type:</b>	Ingestible/Gummy
<b>Sample Name:</b>	25mg Broad Spectrum Gummy Squares	<b>Test Date:</b>	28-Jul-20, 4:41:22
<b>Sample ID:</b>	20SM2027	<b>Method:</b>	1 ul. 80% ACN Isocratic
<b>Sample Description:</b>	Multi-colored, sugar-coated, gummy squares.		

## POTENCY CANNABINOID PROFILE

CANNABINOID	Concentration (mg/gummy)
Cannabichromene (CBC)	0.09
Cannabigerol (CBG)	0.53
Cannabidiol (CBD)	29.82
Cannabinol (CBN)	0.21
$\Delta$ 9 Tetrahydrocannabinol (THC)	ND
Cannabidivarin (CBDV)	0.29

**Notes:**  
 \*N/D refers to a cannabinoid being undetectable.

\* The chart below represents the weight percentage concentration between the cannabinoids in the sample. Each wedge is a representation of the percent of a specific cannabinoid relative to all. To achieve mg/g concentration simply move the decimal point over one place to the right for the percentages given below. (Example: if a cannabinoid was 0.256% weight concentration, this would correspond to 2.56mg/g)

**Notes:**

Free from visual mold, mildew, and foreign matter.
