ATOM20

LONG RANGE UHF READER

ATOMIC RFID

The **ATOM20 UHF Long Range RFID Reader** outshines every competitor on the market, reading only our encrypted ATOM-ID tags by default for top-tier gate and barrier security. Its cutting-edge technology beats rival readers in every benchmark. A unique Red and Green LED bar—green for "Access Granted," red for "No Read"—tells users instantly when access is valid. It can also be programmed to support any Wiegand standard encoding, offering a sleek, reliable access control solution for any setup.
