What special with Epoxy resin furniture

With epoxy resin furniture we can incorporate any object as a component. Like leaf, stone, wood, metal, or anything. The epoxy resin furniture allow us to merge our passion, feel into a furniture.

EPOXY RESIN FURNITURE

A LIMITLESS CREATIVITY

Is Epoxy resin harder/ solid than wood?

If it is used correctly, it is stronger than wood, so as a practical matter its highly stronger in all situations. The wood will break before either glue breaks. As a material, hardened epoxy is stronger and more reliable than wood, glass and MDF. Its surface seems like a gorilla glass hard level. We use well seasoned moisture extracted wood for Epoxy resin furniture to give high solid table tops.
