

**CONSTRUCTION GATE CODE REQUEST
STONE MOUNTAIN
Marble Falls, TX**

This form must be completed and signed by Stone Mountain property owner and their general contractor and submitted as part of the building plan approval process.

A utility gate code will be provided to the lot owner and general contractor which can be given to sub-contractors, delivery drivers, and/or employees of the general contractor for work only on this property owner's lot. The utility gate code will allow entrance Monday thru Friday, 7:00 am til 6:00 pm.

A contractor/lot specific gate code is also assigned which should be used by the general contractor during other days/hours. The general contractor acknowledges that entry into Stone Mountain should be limited to business purposes only and will be accountable for providing this code to others on a need to know basis only.

The property owner and general contractor are aware that the Stone Mountain gate is equipped with 24/7 security camera surveillance as well as 24/7 gate controller transaction data to monitor gate entry and exit. If contractor or property owner is aware of misuse or non-authorized use of either of these gate codes, it must be reported to the Stone Mountain POA immediately in order to delete specific gate codes. The POA will contact the property owner if the gate controller data indicates misuse or overuse of certain codes related to construction on their lot.
