# WHAT TO DO BEFORE YOU MOVE

**5 STEP GUIDE**

*'THE BEST MOVE YOU'LL EVER MAKE'*

@daddyremovalsmcr

*Step 1*

# GET PACKING

It is very important to begin packing early, including miscellaneous items such as kids toys, candles, vases and shoes. If you are not packed and ready to be moved, this can add significant time to your move. We recommend making use of boxes and any items that cannot fit in a box, can be placed in black bags.

*Step 2*

# **DECLUTTER**

Declutter, Declutter, Declutter!

Overtime, we gather a lot of possessions and it is only when we move we realise how much we really have. Whilst your packing it's always good to get rid of items you do not need or no longer want, charities like the Salvation Army or BHF will appreciate these items and you can move into your new home without the extra baggage, plus you will have less to pack.

*Step 3*

# **LABELS**

If you plan to pack your own home, be sure to label everything and not mix items from different rooms together. This will save you time when unpacking and help the movers know where to put each piece of furniture.

We both know you just want to settle into your new home.

## Step 4

# FOODS

In preparation for your move, we would recommend only buying the essentials you need. For safety reasons we do not move perishables foods and cannot move your fridge/freezer whilst the contents are still inside.

By stocking up on less, this will ensure that nothing goes to waste.

*Step 5*

# **KEEP US UPDATED**

If there are any changes to your moving day or the services you require from us, please let us know as early as possible. If you need any further tips for your move, don't hesitate to ask us, its always a pleasure to help.
