EARRINGS AND FACE SHAPE GUIDE

Earrings
always fit.

Your Face Shape

The first step to picking a great pair of earrings for you is to determine your face shape. The most common face shapes are:

ROUND
HEART-SHAPED
SQUARE
RECTANGULAR
DIMOND-SHAPED
OVAL

As with dressing for your body type, the right earrings will draw attention to your best features. They will add contrast and provide symmetry. Often, it will just look and feel right for you.

With Studs+ Stones you can wear your favourite studs and add on a range of different ear jackets that will flatter your face shape.

ROUND

Longer, slimmer drop earrings work especially well with round faces. They can add length and balance.

Have a look at our Avenue and long drop pearl collections.

HEART

For a heart-shaped face, we want to balance and complement the chin.

Here, chandelier and teardrop shaped earrings are a great choice. Something that is wider at the bottom is best.

Our Swing collection is a great fit.

SQUARE

Rounded or curved earrings really suit a square-shaped face. Avoid anything too geometric here.

Studs with our hoop jackets are the perfect fit and come in a range of colours.

RECTANGLE

With a longer face shape, we can add a bit of width!

Studs with short but bold dangles work really well.

Don't be afraid to add a bit of colour to draw the eye!

DIAMOND

Diamond-shaped faces suit diamond studs, of course!

To dress it up a little you can add a bit of softness with smaller, rounded drops.

Our gemstone drops, like these in Onyx, work well.

OVAL

Great news, an oval face works with most types of earrings. Short drops, long dangles, round or geometric, you can wear whatever you love and know it will suit you.

Why not pick our signature Baroque pearls?

About

STUDS ✨ STONES

We believe in women who stand out, take up space and want to be seen. Our purpose is to empower women to be and feel bold, confident, creative and unique.

We make handcrafted, interchangeable gemstone and pearl earring jackets that help you to add your personality to classic stud earrings.
