

STEEL SECURITY GRILLES FOR WOOD AND METAL CURBS

**Standard Industry and
Custom Sizes**

Security grilles shall be OSHA and Cal-OSHA compliant. Grilles shall be made of tubular steel .060 thickness and minimum 1/2" diameter. Tubular cross bars shall be welded to 1" x 1/8" steel flat strap at minimum 6" OC spacing. For Cal-OSHA compliant grilles a center strap shall be added on all grilles larger than 4x4 size. Center straps shall be punched with tubes running through and welded at every third tube to prevent movement. Complete assembly shall be powder-coated white or galvanized
