## NuTrace Touchless Mouse

In the past decade, new evidence has clearly demonstrated that contaminated room surfaces are an important component in the transmission of key health care-associated pathogens. Evidence supporting this view includes: these pathogens persist in the environment for prolonged periods of time, frequent contamination occurs of the hands/gloves of healthcare personnel.

As noted, these investigations are focused on how healthcare professional workers can improve room disinfection while reducing health care-associated infections. "No-touch" methods promise an advancement and step in accomplishing this task.

1

**USB Connection (No additional software needed)**

2

**Stainless steel construction for easy disinfection**

3

**Many possibilities for mounting (with frame or without frame)**

4

**No additional software needed**
