## Virtual visits

Telehealth virtual visits are a great option for quick access and care for minor illnesses. Our visits typically take about 10-15 minutes. The medical professional you speak with is able to send electronic prescriptions, if needed, to your pharmacy to be picked up at your convenience.

In the event of a medical emergency, virtual appointments are not appropriate. Additionally, complex or chronic medical conditions, care requiring a physical exam or test, or injury requiring in-person care and intervention (such as fractures or concussions) are not eligible for a virtual visit.

*Common conditions treated during a virtual visit:*

**Cold/Flu**

**Bronchitis**

**Sore throat**

**Stomachache**

**Fever**

**Diarrhea**

**Allergies**

**Rash**

**Pink eye**

**Bladder infection**

**Migraines/Headaches**
