

Fabric Lamination

Custom Lamination for Class A finish packaging

L-S Industries, Inc. provides quality laminates for creating high-quality reusable packaging. Using corrugated or corrugated plastic, we can laminate Tyvek®, Evolon®, crosslink foam, brushed polyester, spunbond, or closed-cell foam to create a non-scratch surface for packaging class A finish automotive parts. These materials can be used to create custom partitions to fit inside existing totes and bins or we can create the whole tote or bin for you.

Partition Sets

Crosslink Foam Lamination

Converting Capabilities

L-S Industries (L-SI) specializes in laminating different fabrics and foams to corrugated and corrugated plastic. We can laminate on just one side, both sides, and even “rollover” the edges to give your partition sets a smooth top edge.

Our advantages include short lead times, low minimums, and central ship point (Knoxville, TN).

Materials Converted

We currently purchase both corrugated and corrugated plastic in large volumes to be laminated with:

Evolon® (standard & ESD)

Crosslink Foam

Brushed Polyester

Spunbond

Closed-cell foam

Other materials available upon request

We always try to have material on the floor, so our lead times are some of the best in the industry. We can supply standard size sheets or cut them to size for you. We can also laminate sheet you send to us.

Products Produced

L-SI converts materials to meet our customer's exact specifications. Some materials used in automotive parts packaging are:

- Partition sets
- Layer pads and divider sheets
- Corrugated plastic totes & trays
- Bulk bins
- Collapsible utility carts
- Returnable corrugated plastic boxes
- General packaging products
- Custom packaging products

L-S Industries celebrates almost 50 years of expertise in converting, laminating, and packaging manufacturing. It is our vision to be a leader in packaging manufacturing by providing innovation. We strive to provide excellent service and timely delivery for our customers. While the packaging we provide is not your final product, we realize it is critical to your business and we treat it as such. The dedicated employees at L-S Industries are focused on customer service and creating a business partnership with our customers to deliver optimum value.

L-S Industries believes in recyclable packaging products to help limit the impact on our environment. We recycle all available scrap in our facility, and we encourage our customers to recycle the materials we sell them as well.
