Asset strategy development

SAMP development

Maintenance Performance (KPIs, cost savings, identifying areas for improvement)

RCA, FMECA and RCM

Asset Management system improvements

Asset integrity

Risk management

HSE improvements for operational management

What we do

ACR Asset Management is a “hands on” asset management consultancy designed to work with you to enhance your asset management practices, deliver projects or procure new services

ACR Asset Management

Asset Management | Procurement | Project Delivery

Project Delivery

Deliver projects for clients:

Managing maintenance contracts

Deliver infrastructure projects (\$500k to \$5m)

Cost Management

Establishment and transition to collaborative contracts

Improving contract performance

Our Benefits

We are small enough to provide “hands on” services. We deliver services as if we own the assets. We care about high service levels through striving for the highest performance outcomes for you and your business.
