

HOSPICE VS. Palliative Care

When faced with critical disease, when to choose Palliative Care vs Hospice Care can be very stressful. Here is a quick breakdown of the two. Call Stoneridge today 480-306-8655 with any additional questions

Palliative Care

- Used at any stage of disease
- Can have curative intent
- Provided in clinical or home setting
- Can be paired with treatment

Overlap in Both

- For people with serious illness
- Comfort Care
- Pain management
- Symptom Relief

Hospice Care

- Used when prognosis is 6 months or less
- No curative intent
- Provided in home setting
- Treatment has been discontinued
