

The Ledgers Franchise Opportunity

Developed in 1994, Ledgers was created by a unique team of Professional Accountants when the need for professional, high-quality, consistent business services was recognized.

Our Mission is quite simple. We intend to become the dominant service provider in the Canadian small business community.

How will we do this?

By providing our network members with an unparalleled depth and breadth of support services so they can provide accounting, bookkeeping, tax, payroll and other business related services to small business owners at rates they can afford.

Our Network Members are given the ability and tools to meet the needs and demands of small business owners on both a national and community level.

We provide information and support services that every business owner and taxpayer in Canada needs.

Our motto, "The Numbers Looks Good!"[®] is a direct reflection of the quality, professionalism and affordability that a Ledgers Network Member offers to their local business community.

The model continually evolves and grows as the demand for our services grows.
