Discovering Psychology
– Video 16 – Testing and Intelligence
Annenberg Learner [2001]

1. In your own words, define intelligence?
2. How can a person answer the question “How smart are you?”
3. Describe the various types of tests used by psychologists.
4. What is the common, overall goal of all of the tests described above?
5. Who is Galton and what was the focus of his research?
6. Describe the beliefs of Binet and the focus of his intelligence test, including mental age.
7. How and why was Binet’s test used in the United States?
8. Who is Terman and what changes did he make to Binet’s original test (must address IQ)?
