They will grow in their artistic confidence as well as learn new ways of expression using their own style.

- Enclosed lines make organic and geometric shapes which can be used in countless sizes and combinations to make a variety of designs.
- Color adds the emotional spark to art! Students will use color harmonies to add expressive power to any illustration or design.

Leighton Isaacs has been teaching art for over 30 years to children, teenagers and adults. It is her passion to see each student grow in skill, originality and confidence in their unique artistic expression. As an experienced and skilled artist, she has developed specific ways of teaching artists at every level to increase technical skill as well as to develop a personal vision for their artmaking. Leighton loves to inspire and encourage her students to be creative problem solvers and has successfully prepared many young people for careers in the arts. Watercolor is such a luminous medium! It is Linda's goal to have it grab you and become a passion as it did for her!!

In this 2-day workshop, students will be designing paintings from the photographs they have chosen. Students will not be copying them, but cropping and rearranging elements to simplify and push their creativity, having fun, and taking some risks with color and design.

The day begins with students gathered around the instructor who works with each student in turn and talks about a selected photo. Different ways to approach the subject will be discussed. All students will take away from these sessions new ways to work from their own photos.

Demos are done as called for based on the various subjects. The workshop supply list is on the website [www.lindagriffin.com](http://www.lindagriffin.com). Feel free to contact Linda via email or text if you have any questions about supplies. Linda's bio and additional information is available in the *Additional Instructor Information* document in the Download section at the top of the [www.mooresvillearts.org/workshops](http://www.mooresvillearts.org/workshops) webpage.
