

KIT SIGHT

Live Streaming
Solution

“Instant Vision, Unmatched Reliability”

“KIT SIGHT” is a Web-based advanced live streaming platform tailored for body-worn cameras, providing real-time video and multimedia capabilities for diverse applications. Our platform ensures seamless and reliable communication by integrating voice, video, image, and text dispatching.

Product Highlights

“Ease of Deployment”

Facilitates remote configuration and centralized management of user permissions via KIT SIGHT. It also supports virtual deployment.

“Distributed Deployment Mode”

Utilizes IP networks such as Metropolitan Area Networks (MANs), optical fibers, and satellite links, overcoming traditional distance limitations of copper cables and allowing for devices to be located far apart.

“User-Friendly GUI”

Available in multiple languages, enhancing accessibility and ease of use.

“High Scalability”

Allows for cascading of KIT SIGHT units or the selection of larger-capacity systems to accommodate a growing number of users.

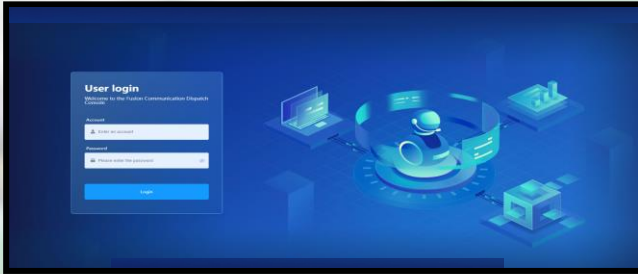

“High Reliability”

Features dual-host standby deployment to ensure continuous communication even if one host fails, thus providing high reliability.

“Versatile Development Interfaces”

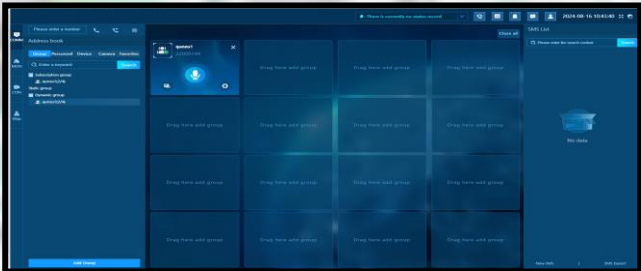

Provides various secondary development interfaces for smooth application migration or cost-effective development of new applications by customers and partners.
