

EMS

Evidence Management
System

kingtent.co.th

“Streamlining Electronic Evidence
Transparency, Compliance, and Efficiency.”

System Abstract

The Evidence Management System streamlines the collection of videos, audios, and photos from body-worn cameras (BWCs) by uploading them to the digital evidence management platform. This significantly reduces the manual workload and saves valuable time for law enforcement officers. Additionally, EMS allows you to view, play back, and export digital evidence, manage BWCs, and upgrade their firmware.

Product Highlights

"Log Records"
Collection Station Logs

"Reports Generation"
Statistic records of total storage base on file type

"Device Details "
View Basic Device Information

"Auto Data Handling "
Automatic Data Collection and Data Clearing

" BWC Setup"
Basic Body-Worn Camera Configuration

" Data Access & Management "
Data Viewing, Retrieval, Browsing, and Classification

"Upgrade Management "
Unit Upgrade Package Management

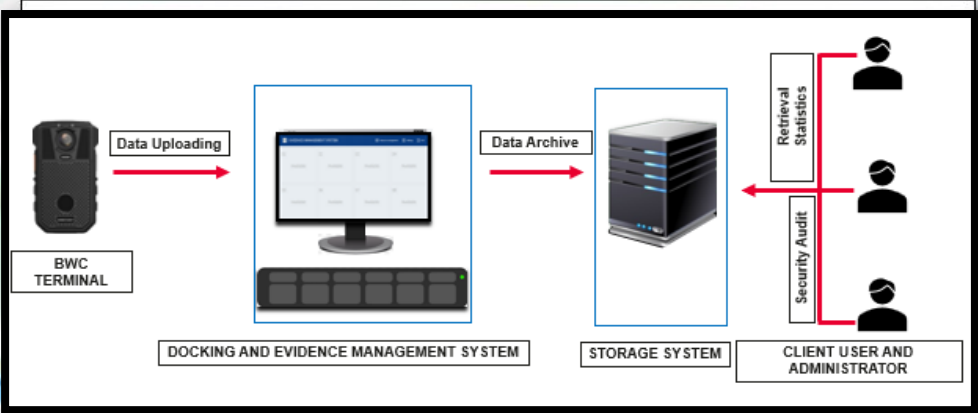

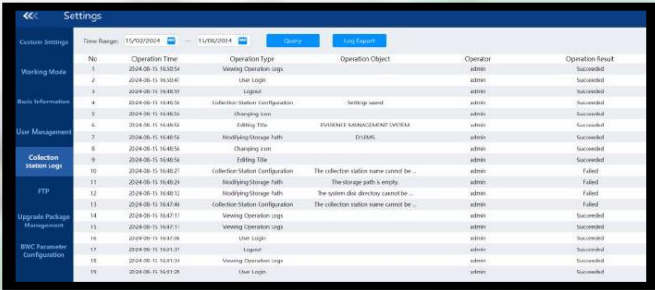

"Capacity Alert "
Storage Capacity Alarm at specific storage levels

"VideoTrim & Tag"
Allows video reduction and enriching them with metadata search

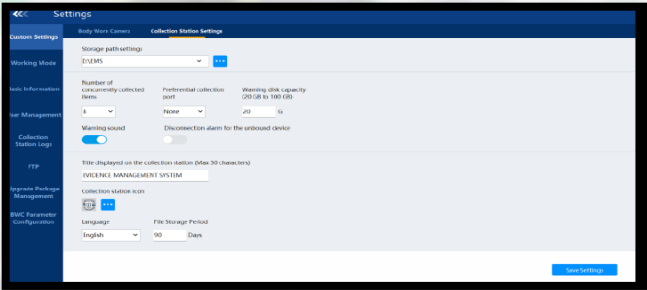

Scenario with docking stations
