

Display Setup Instructions

1. Charge the Device

Please begin by charging your display using the supplied charging cable.
The device may not power on straight out of the box until it has some charge.

2. Power On

Press the middle button on the device to power it on.

3. Default Screen

Once powered on, the display will show the default image.

4. Enable Bluetooth

Press the top button once (do not hold it).

This will activate the Bluetooth connection mode on the device.

5. Download the App

Scan the QR code to download the companion app for your device.

6. Connect the Device

Open the app on your phone.

Make sure the Bluetooth symbol is still visible on the display, then:

Press the red "Disconnected" button at the top of the app.

The button will turn green, indicating the device is now connected.

7. Upload Images or Videos

Select the images you want to upload from the app.

Videos should be uploaded using the GIF option within the app.

8. Managing Images on the Display

You can manage images directly from the display:

Swipe down from the top of the screen with your finger.

This will open the quick menu where you can access:

Battery level

Delete (trash icon)

Brightness settings

Sleep mode

Disco light mode
