

**Option** to  
**Success**

Healing Walls Project (HWP) and Option to Success (OTS) have collaborated to bring **community art classes, workshops and public art** to the Algonquin community that is **completely free** to participants. Option to Success works predominately with young girls and femme identifying individuals.

This Women's History Month, help us to begin the healing process through art-making with the proper tools. Our ability to provide quality art programming and to sustain is dependent on your art supply or monetary donation.

**Support your art community by helping to cultivate the artists of the future today!**

Healing arts are creative practices that promote healing, wellness, coping and personal change.
