PROFESSIONAL OVERVIEW

A highly skilled and creative senior project/program manager who has experience in a broad spectrum of businesses (medical, commercial, and non- profit) and possesses a strong technical and organizational background. 20+ years of PM experience, including leading international teams and proven track record with satisfied business customers. During many of these engagements, she facilitated both management and technical training sessions. Recently, she has written content for video PM training, and was recorded in these sessions. Also has drafted a risk management course, with a novel approach to risk planning (to launch in 2023).

WORK EXPERIENCE

Project/Program Manager
Companies including (Steward Health Care, HealthCare Administrative Service (HCAS), Boston Medical Center, Blue Cross Blue Shield of MA).

All the above included detailed SDLC processes and managing both PMs/Bas and technical resources. Project objectives included: EMR upgrades, large database migration in hospital systems, company-wide firewall replacement, upgrade of hospital-wide Help Desk system. PMO process setup at multiple companies. Management of multiple vendors plus nationally and international based teams.

Highlights:
- Successfully implemented user access to new EMRs, while maintaining up-to-date security measures.
- Large-scale data migration of a broad range of medical data, with full data integrity and implementing an Epic interface to legacy data.
- Ontime/on budget implementation of alignment to national health insurance data uploads and reporting.

Training – Corporate and PM-Focused
Various Companies, PMI Chapters, MindEdge, Acuity Institute

Highlights:
- Drafting of 3 hrs of PM principles and video-recorded; materials integrated into online courses.
- Multiple Sessions to support phases of SDLC, emphasis on security measures.
- Training team of BAs on new SDLC approaches per IBM processes.
- Training of PMs – on corporate SDLC processes (all phases).
- Multiple topics presented to PMI chapters – re: popular trends in management.
- Various corporate/technical training sessions (data access and data integration)
