

SeaGuardian Safety & Emergency Disclaimer

1. Purpose of This Disclaimer

This Safety & Emergency Disclaimer outlines SeaGuardian's responsibilities and the user's obligations regarding the safe use of SeaGuardian devices, software, monitoring platforms, and maritime alerting systems.

By using SeaGuardian services, you acknowledge that maritime safety requires combined human judgement, operational best practices, and compliance with applicable regulations.

2. No Substitute for Professional Maritime Judgment

SeaGuardian systems are designed to support maritime awareness, monitoring, and alerting but are not a replacement for professional seamanship, navigation skills, or emergency procedures.

Users remain fully responsible for vessel operation, situational awareness, and decision-making at all times.

3. No Guarantee of Emergency Response

SeaGuardian does not guarantee timely emergency detection, alert transmission, or response.

Environmental factors, connectivity issues, device faults, or third-party disruptions may delay or prevent emergency notifications.

Users must maintain appropriate backup communication systems and comply with maritime safety standards.

4. Device Limitations

SeaGuardian hardware relies on GPS, cellular, satellite, or radio networks where coverage may vary.

Device performance may be affected by weather, signal interference, improper installation, physical obstruction, or tampering.

Regular testing and maintenance of devices are the user's responsibility.

5. User Responsibilities During Emergencies

In any emergency, users must:

- Follow established maritime emergency procedures.
- Contact relevant authorities using primary communication equipment.
- Not rely solely on SeaGuardian alerts for life-critical decisions.

6. No Liability for Critical Incidents

To the fullest extent permitted by law, SeaGuardian is not liable for injuries, losses, delays, or damages resulting from:

- Failure of devices, connectivity, or data transmission.
- Incorrect installation or misuse of equipment.
- Human error, negligence, or unsafe operational practices by users.
- Environmental or unforeseen circumstances beyond our control.

7. Third-Party Dependencies

Some SeaGuardian features rely on external networks, satellites, and service providers.

SeaGuardian is not responsible for outages, inaccuracies, or failures caused by third-party systems.

8. Emergency Preparedness Requirements

Users are responsible for ensuring they maintain:

- Fully functioning primary safety equipment (radios, life-saving appliances, navigation tools).
- Compliance with IMO, MCA, SOLAS, and local maritime regulations where applicable.
- Adequate crew training and operational safety procedures.

9. Updates to This Disclaimer

SeaGuardian may update this Disclaimer to reflect changes in technology, regulations, or safety guidance.

The latest version will be available on our platform.
