

QUICK RISK WARNING

(READ BEFORE USING NDC / NDCjr)

Last Updated: 1/25/26

Website: nodumpcoin.com

Project Operator: ROCHU

Official Email: ndc@nodumpcoin.com

NDC and NDCjr are high-risk digital assets on Solana.

By interacting with NDC or NDCjr, you agree to understand and accept the risks below.

TOP RISKS

You can lose everything

NDC and NDCjr can drop to near zero value. You may lose **100%** of funds used to buy, swap, or hold tokens.

No guaranteed liquidity

You may not be able to sell when you want. Liquidity can disappear, and slippage can be extreme.

No promises of profit or stability

Nothing on this site is financial advice. There are **no guarantees** of returns, yield, price stability, or future value.

Smart contracts can fail

Token contracts, vesting contracts (including Streamflow), DEX contracts, or DeFi protocols can be exploited.

Bots, MEV, and manipulation exist

On-chain trading is exposed to bots, front-running, sandwiching, and coordinated pump/dump behavior by third parties.

Wallet security is your responsibility

If your seed phrase is lost or stolen, funds are usually gone forever. The Project will never ask for your seed phrase.

Third-party platforms are not controlled by the Project

Pump.fun, Jupiter, Raydium, Phantom, Solflare, Dexscreener, DEXTools, GeckoTerminal, Birdeye, Photon, GMGN, Solscan are third-party tools. They can fail, restrict access, or show incorrect data.

Regulation can change fast

Crypto rules and enforcement can change at any time and may impact your ability to trade, access tools, or use DeFi.

NDCjr is higher risk

NDCjr may be more speculative, meme-driven, and volatile than NDC.

IMPORTANT FINAL NOTE

These risks are not exhaustive. Unknown risks exist.

Use self-custody safely, verify contract addresses, and never trade more than you can afford to lose.
