

viVid

Video “Pure” Signal Conditioner

viVid offers video signal conditioning for home theater system applications.

Proprietary Algorithm Digital Defined Power® technology generates a harmonic electric field in order to resonate the video signal. The energy boost manifests as increased clarity, color saturation, image contrast, and dimensional qualities.

INSTRUCTIONS

Disconnect the RG59/U (RG6) antenna cable from your digital tv converter box.

Connect the cable to either connector of Vivid.

Connect an RG59/U (RG6) cable to the connector located on the other side of Vivid.

Connect the other end of this cable to your television or video device.

Connect the DC transformer AC plug to any standard wall outlet and attach the DC adapter plug to Vivid. The LED indicator illuminates indicating the unit is operating.

Watch your favorite video programs with Vivid!

Note: Vivid also benefits audio systems with increased clarity and tonality.
