Locations

To the right is a fraction of the wide array of locations that can benefit from a thermal detection solution.

Airports

Casinos

Education

Hospitals

Theme
Parks

Churches

Offices

Factories

Theaters

Arenas

Retail
Stores

Key Benefits of ICI Solutions

HIGH ACCURACY

Accurate to within a fraction (± 0.1 to ± 0.3 Celsius) of one degree Celsius. Top quality internal sensors, sophisticated software, leading optics, and temperature reference calibration make this possible.

OUTSTANDING CUSTOMER SUPPORT

Software upgrades, yearly calibrations, remote troubleshooting, and overnight hardware replacement, if required. ICI also provides extensive training on setup and how to use the equipment which makes it easy for any person to use.

FAST AND STREAMLINED SCREENING

Advanced screening solution ensures rapid safety checks that last less than a mere 2 to 5 seconds per person.

Key Features of ICI Products

1. Centralized Monitoring

Control all of your company's cameras from one centralized location.

2. Access Control with Badging

Restrict access to certain doors, rooms, and buildings with our badge control feature.

3. Declaration Forms

Add customized forms to your kiosk station to collect critical information.

4. Red Light / Green Light

Easily identify body temperatures with a red light/green light signal system.

5. Dual Visual Camera

Display side-by-side views of both thermal and traditional camera images.

6. Facial Detection

Detect an individual's face faster with facial detection software, resulting in a quicker temperature scan and less time waiting in line for customers or employees.

7. Facial Recognition

Track individuals' identity within your organization to increase safety and security.

8. Email Notifications

Receive internal email notifications when an individual fails a temperature test so your team can take the necessary actions.

9. Print Badge

Once scanned at kiosk individuals will receive a printed ticket that contains their picture, temperature and whether they passed or failed the temperature screening test.

10. Audible Audio

System will give off an audible alarm when an individual fails the temperature screening test.

11. Light Alert

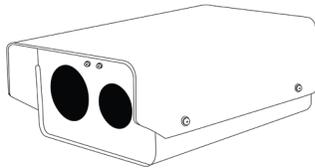

Light on top of kiosk showing green or red light to provide alert if someone has passed or failed the temperature screening test.

12. Touchless Screen

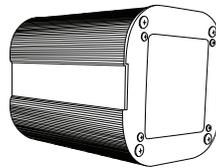

Provides touchless functionality if desired.
