

TOMAHAWK REA TRANSITION TO FORTISALBERTA UPDATE

We want to update you about the sale to FortisAlberta. Both companies have submitted the required regulatory applications to complete the transfer. The original completion target was July 9, 2024.

The Alberta Utilities Commission (AUC) issued a statement on our application on June 26, 2024, indicating that no further process is necessary and considers the record of our proceeding to be closed. The AUC aims to issue a decision in this proceeding before our July 9, 2024, deadline. The sale will be delayed slightly due to the extended process, but provisions have been made for the new timing.

Starting from July 9, 2024, we will enter into a short-term Distribution System Operator (DSO) Agreement with Fortis and a Regulated Rate Operator (RRO) Agreement with EPCOR. Distribution costs are expected to remain relatively unchanged until the sale is finalized. The scheduled meter switch-out on July 9, 2024, will proceed as planned.

In the meantime, you can still reach out to the Tomahawk REA office with any questions or concerns at 780-514-8732 or office.trea@gmail.com.
