WHAT TO EXPECT

Your Service Timeline

DAY 1-7

Curing Period — No Wash

Keep vehicle dry, out of direct sun, and away from trees. No washing, no products for 7 days.

2-WEEK FOLLOW-UP

Check-Up + Topper Option

We return to inspect the coating, handle touch-ups at no charge, and discuss topper upgrades.

EVERY 2-4 WEEKS

Maintenance Wash Required

Two-bucket hand wash with pH-neutral, SiO₂-based soap only. Dry immediately with microfiber.

6-MONTH VISIT

Full Inspection & Service

Full coating check, decontamination wash, iron treatment if needed. Written condition report included.

KEEP YOUR WARRANTY ACTIVE

Proper Maintenance Wash Procedure

Following the correct wash process is required to maintain warranty coverage. Automatic brush-style car washes void the warranty immediately.

<p>STEP 01 Pre-Rinse</p> <p>Rinse top-to-bottom with hose or pressure washer to remove loose dirt before any contact.</p>	<p>STEP 02 Foam Stage (Optional)</p> <p>Apply foam cannon soap, dwell 1–2 minutes, then rinse. Lifts contaminants touchlessly.</p>	<p>STEP 03 Two-Bucket Wash</p> <p>One soap bucket, one clean rinse bucket with grit guards. Wash top-to-bottom in straight lines, rinsing mitt between each panel.</p>
<p>STEP 04 Final Rinse</p> <p>Thoroughly rinse all soap top-to-bottom. Clear all panel gaps and trim.</p>	<p>STEP 05 Dry Immediately</p> <p>Blot-dry with a plush edgeless microfiber — never drag. Never air dry. Minerals in tap water cause permanent water spots.</p>	<p>STEP 06 Drying Aid Spray</p> <p>Apply ceramic detail spray on a damp surface to boost gloss and refresh hydrophobic performance after every wash.</p>

<p>■ WARRANTY VOID</p> <p>Automatic brush-style car washes — zero exceptions.</p>	<p>■ NEVER USE</p> <p>Soaps with wax, petroleum distillates, or pH outside 5.0–9.0.</p>	<p>■ AVOID</p> <p>Washing in direct sunlight or on a warm/hot surface.</p>	<p>■ REMOVE ASAP</p> <p>Bird droppings, tree sap & bug splatter — they etch fast.</p>

DISCUSSED AT YOUR 2-WEEK & 6-MONTH VISITS

Optional Topper Upgrades

Add a topper layer over your ceramic coating to rejuvenate hydrophobics, enhance gloss, and extend protection between full services.

<p>SiO2 Spray Sealant</p> <p>Rejuvenates hydrophobic properties and adds gloss. Applied spray-and-wipe as a drying aid after each maintenance wash. Best for regular upkeep.</p> <hr/> <p>■ 3 – 6 months per application</p>	<p>Carnauba Wax Topper</p> <p>Deep warm gloss with a light sacrificial protection layer over the ceramic coating. Must be a ceramic-compatible, petroleum-free wax.</p> <hr/> <p>■ 4 – 8 weeks per application</p>	<p>Graphene Spray Coating</p> <p>Premium reinforcement topper. Superior UV protection, anti-static properties, and exceptional water beading. Ideal for the 6-month service.</p> <hr/> <p>■ 6 – 12 months per application</p>

WHAT WE STAND BEHIND

Warranty Coverage

COVERED

- Coating delamination due to application error
- Premature loss of hydrophobic performance
- Uneven coverage or high spots from installer
- Grout or sealant failure on ceramic surfaces

NOT COVERED

- Brush-style automatic car wash damage (VOID)
- Improper soaps or chemicals used by owner
- Swirl marks from incorrect wash technique
- Environmental damage left untreated
- Third-party paintwork or modifications

AUTHORIZATION & ACKNOWLEDGMENT

By signing below, the client confirms they have received and understood this Warranty & Care Certificate and agrees to follow the maintenance procedures to keep their warranty active.
