

7. Permit Preparation & Application

For projects requiring permits, our team will prepare and submit the necessary documentation to your local municipality. We manage the permitting process on your behalf to ensure all approvals are obtained before construction begins.

8. Project Kickoff Meeting

Once permits are approved, we will schedule a project kickoff meeting at your property. During this meeting, you will be introduced to your project manager and site manager. We will review the project timeline, construction schedule, and next steps before work begins.

9. Construction Begins

With planning complete and permits secured, construction officially begins. Our team will coordinate trades, materials, and schedules while maintaining clear communication with you throughout the process.

10. Construction Progress & Communication

Throughout construction, we will conduct scheduled site reviews and provide updates on progress. Our structured payment schedule ensures that each stage of the project is completed and verified before the next phase proceeds.

11. Final Walkthrough & Project Completion

Upon completion, we will conduct a final walkthrough together to ensure every detail meets our quality standards and your expectations. At this time all remaining documentation will be finalized and the project will be formally completed.

LET'S BUILD YOUR DREAM HOME!
