

**Our comprehensive course helps you learn hoodoo at your own pace. We help you with the methods, the history & the application of hoodoo in all its forms...**

**How to practice this path has been poorly appropriated & misconstrued by other cultures & that has created a level of confusion. Many don't know what to believe or how to even begin the path respectfully. We do our best to help clarify the myths from the reality & methods, based on historical references and current skills within our current practice at Memphis Conjure.**

**As Life-Long Practitioners with many elders still involved, we feel we have an understanding of the path & seek to protect it, so that it does not devolve into misguided nonsense and help our students understand the true sacredness & the gift of hoodoo, from a people who relied so much its basic principles.**
