

What to do in the Face of a coup.

A few months ago JOLT had a meeting on the Embattled Transition where all of Trump's actions thus far were predicted.

Our speaker Patricia Gulbis Dabagian-Paul laid out how to prevent a coup. She called on us to get loud before this got out of hand. Unfortunately we could not get the attention needed.

What we must do now is put pressure on everyone we know in every stakeholder position to put pressure on Republicans to invoke Article 25 or Impeach Trump now. This is people on boards of colleges, hospitals, financial institutions/ people in finance/tech, etc.

He cannot be allowed to retain control of the military and be privy to government secrets until January 20th.

He wants chaos. He wants to invoke the insurrection act. He wants complete control and the ability to call in foreign intervention.

Cell towers are vulnerable. Do it now.

On another note The only way he backs down is if he thinks things will be worse for him if he goes forward. He needs to know treason is at the end of this road.

No more wait and see.

I am reaching out to my university and law school and to my financial institutions, labor leaders, activists and government, and HUMC. Harvard law alum are calling on Harvard to revoke Cruz's law Degree. Reach out to everyone you know. We can't leave this up to anyone else.

Onward,

Cathy
