

CBD Isolate

CBD isolate is cannabidiol in its purest form. To produce this extract, **CBD** is isolated and then refined to strip out any additional cannabinoids, terpenes, and plant components found in the hemp plant. The final product is a fine white powder that contains around 99% cannabidiol. **CBD isolate** powder and **CBD isolate** crystals are the purest, most powerful punch of CBD you can get your hands on.

CBD isolate has quickly become popular among patients, because it gives users the ability to formulate their own CBD foods, supplements, edibles, and other products. CBD isolate has zero taste and no odor, allowing it to be dissolved into oils and fats like butter, or infused into liquids like coffee, smoothies, or honey.

For those needing more specific CBD doses, isolate gives patients complete control of exactly how much CBD goes into each serving. Because CBD isolate is over 99% pure, each milligram of CBD isolate represents a milligram of active CBD. Accurately measuring out CBD servings requires a scale that measures small weights in milligram.

The hemp trinity: Essentials, Nutritionals and Therapeutics
