

419 Holistics provides a unique buying experience to our customers, one that focuses on knowledge first, “GetThe419”. We understand the years of misleading information and the stigma that has been put on HEMP and are striving to change that.

Our solution; 419 Holistics offers access to unbiased information on hemp and how it can positively impact both the consumer’s wellbeing and the overall health of the planet. 419 Holistics offers a wide range of hemp-based products that achieve these goals.

Born right here in Atlanta we feel a strong sense of community. By providing this great city with the proper tools, such as Hemp Crete, Bio-Fuels, alternative fabrics, and most important of all, an alternative to harmful pharmaceuticals, we can build it up as a cleaner, better educated community. Not only through education on the vast potential of hemp and its separation from marijuana, but by teaching teamwork and integrity through projects/events around the city.

All our hemp is sourced only from the trusted fields of North America. Our Therapeutic products go through extensive testing by three independent laboratories to insure the highest level of purity and quality.

419 Holistics operates solely with integrity and compassion. We want our customers to not only view us as a quality hemp store but as an experience. From website to showroom floor, 419 Holistics is what nature intended.

The hemp trinity: Essentials, Nutritionals and Therapeutics
