

Vape Battery Settings

- Press button 5 times, rapidly, to turn on or off.
- Press the button 3 times, rapidly, to change heat settings.

Green = Low : **Blue = Medium** : **Red = High**

**The voltage can affect the potency and taste of the oil, so experiment to find your personal preference.*

- Press button twice to preheat the coil. You will see a rainbow effect as the battery preheats. The rainbow effect will stop, indicating you are ready to vape.

**It is especially important to preheat the coil on cold days.*

Adding Vape Oil

- Unscrew mouthpiece and fill with oil
- Connect your oil cartridge to your charged battery by screwing in the threaded end into the top of you battery

*** Please charge device prior to first use.*
