EMPIRE

NEW STYLE

“

Empire New Style is the ideal vertical refrigerated display unit for pastries and ice-cream products, restaurants and new catering outlets

The elegant, strong, modern lines meet the need of those who just don't settle for showing foods but also want to engage and stimulate”

“Elegance
& Class”

EXCLUSIVE DESIGN

The linear design includes a display case made of screen-printed tempered glass, heated in low-temperature models.

The elegant dimensions and slender structure with integral “invisible” handle optimise visibility from the first to the last shelf.

The internal supports, designed to lighten the structure and ensure the utmost versatility, allow full use of the entire display surface and place the focus firmly on the product itself.

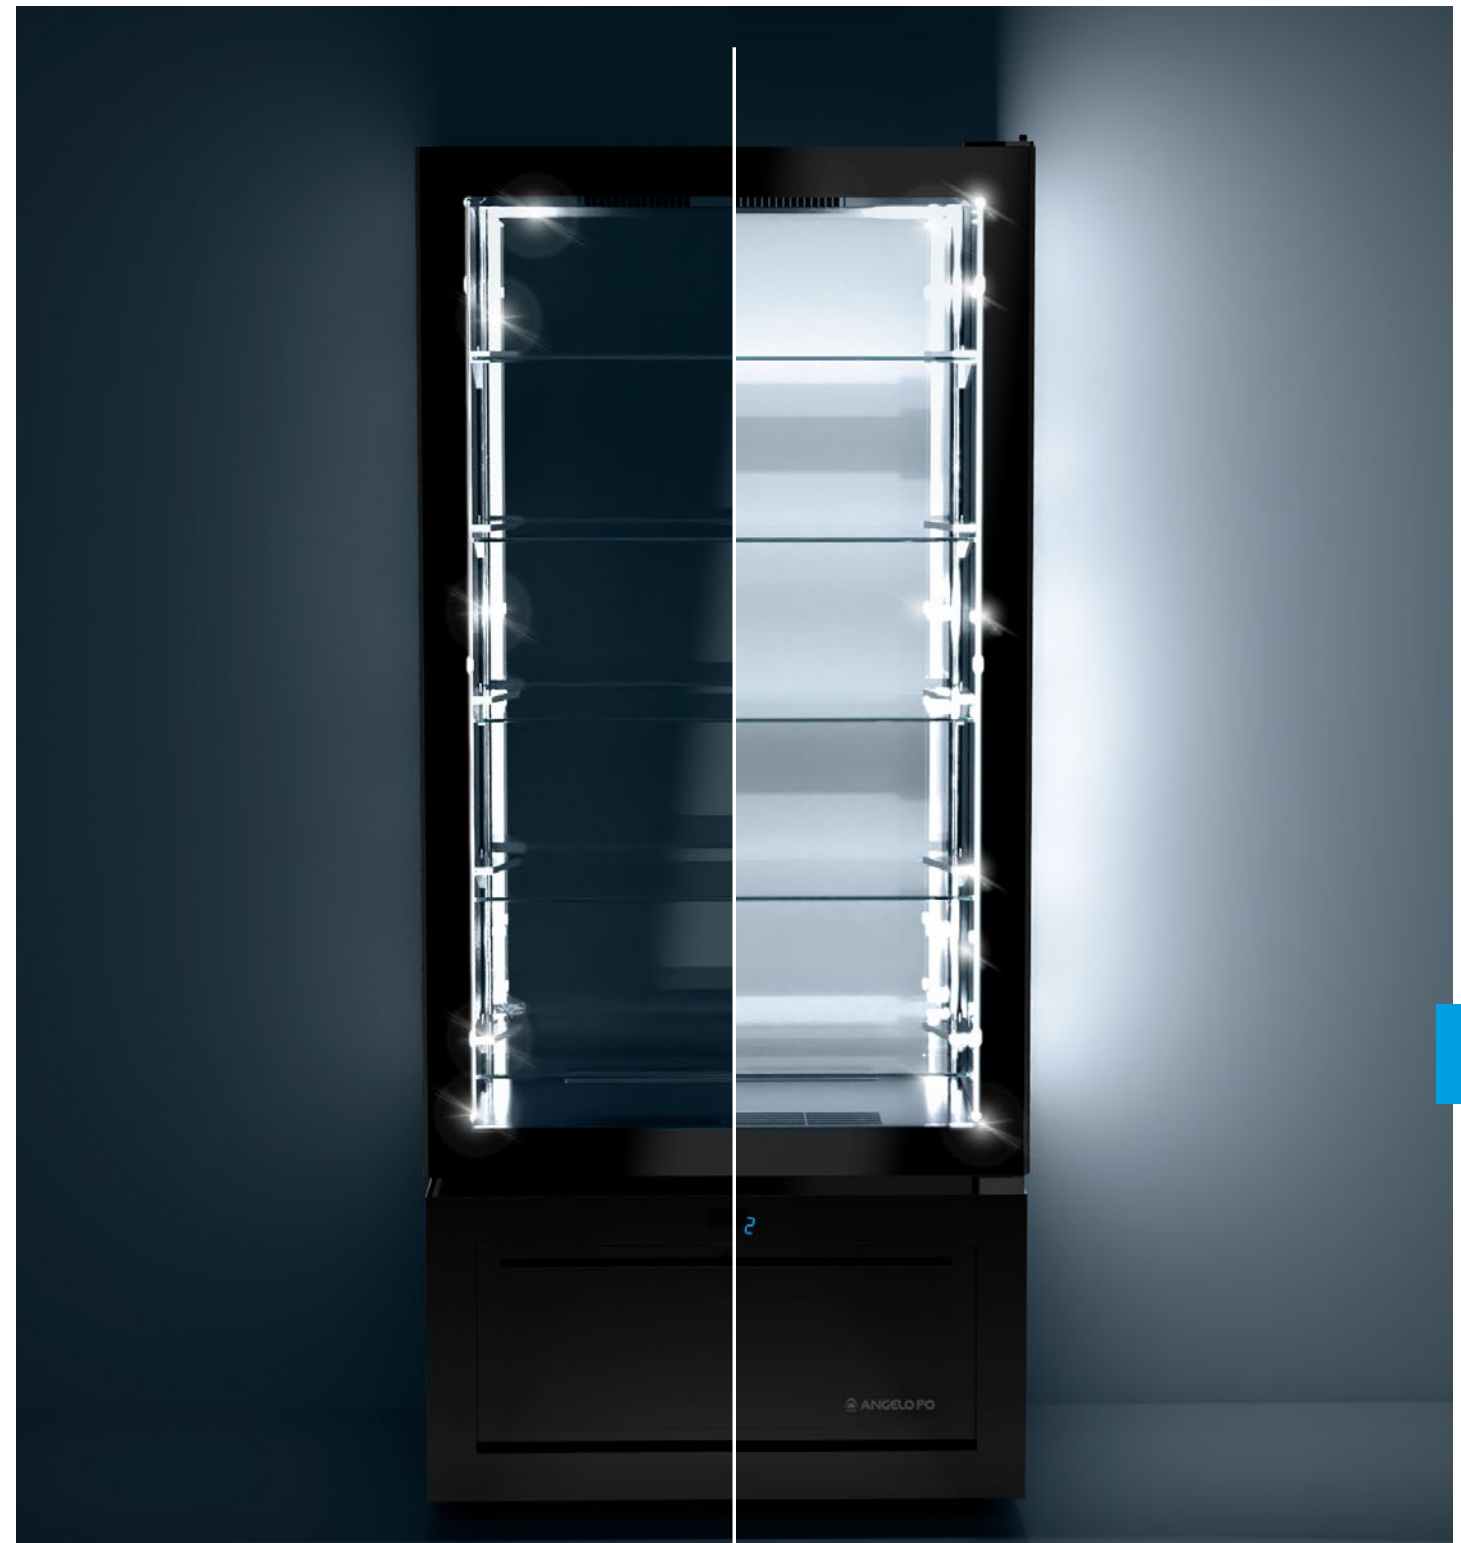

The contemporary styling of the base section maintains the display unit’s purity of aesthetic and cleverly conceals the control board, while the display is constantly visible for monitoring operation at all times.

DYNAMIC LIGHTING

The high brightness anti-glare LED bars provide lighting that adapts to suit the surroundings: from warmer effects for intimate ambiances to an icy tone for more modern interiors.

The type of light can be changed at any time depending on the product displayed, to underline the character of every creation, from chocolate to cream pastries, and from classic cakes to single-portion confectionery... you will have the right lighting for every one!

SIXTH SENSE

Empire New Style brings to life the products you display: with its PIR Sense proximity sensor, the display case changes light intensity as customers approach. It tempts customers to make a purchase, captures their attention, enhances your customer care and adds value to your products.

Empire New Style launches a new generation of display units: no longer inert, they engage and communicate with the customer!

8

TRENDY COLOURS

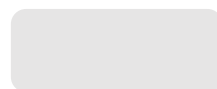

Customers have their choice of three colours, White, Black and Sablè, making Empire New Style adaptable to any location and matching the latest trends in interior design. From contemporary to industrial to eco, Empire New Style is always elegant and discreet.

SABLÈ

WHITE

CONNECTED AND ALWAYS UNDER CONTROL!

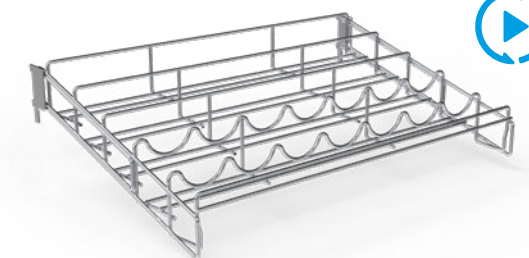

The Empire New Style refrigerated display units guarantee a safe and quality display through the control of the operating parameters and the HACCP alarms, thanks to the electronic board and also remotely through the connection to the **APO.LINK** portal.

9

EMPIRE ALSO EMBRACES WINE

Empire is not only extraordinarily beautiful and elegant, but also extremely flexible: with the wine bottle accessory you'll be able to construct your Empire to your needs, choosing the number of bottle shelves and the display mode: vertical, horizontal or mixed up to 84 wine bottles (Ø 75 mm vertically on three shelves).

“

With winning design, exclusive, with even the smallest detail looked after, it has been conceived with MASSIMOMUSSAPI so as to make Empire the vertical refrigerated display unit that everyone was waiting for!

Elegant, innovative, adaptable to any type of ambience, it is unique and on the cutting edge in its category ”

THE SECRET OF TEMPTATION

Designed to connect the elegance of its shape with the highest evaluation of content, Empire transforms exposition into a real exhibition of taste that attracts and draws you in at first sight.

The display case, completely in tempered glass, heated in low tempered models, with its innovative shelf support system, increases visibility from any sight angle.

The studied dimensions, connected to the lightness of the structure with integrated “invisible” handles, multiply the display space and optimise visibility from the first to the last level.

The led lighting creates a luminous and inviting ambience.

The lower structure without frontal holes, masterfully hides the wheels and renders the display unit sleek and light.

“The luxury of performance and reliability”

Conceived to guarantee the best in the conservation of products on display, Empire synthesises the perfect balance between design and refrigeration technology: the quality of the Italian product achieves excellence with the experience and the care that has always characterised made in Angelo Po.

The refrigeration systems of the various models, is planned to offer maximum performance for every kind of product displayed.

The positioning of the shelves, the door - stop system and the electronic panel control board with the signaling of the HACCP alarms are expressions of quality and function, cared for in every minute detail for a display unit of the latest generation.

TO INCREASE SALES

Empire has the magic ability to multiply the value of displayed goods, with the aim of increasing sales. Customers are carried away with temptations offered by elegant, bright displays that stimulate their desire to indulge in pleasurable, special, tasty treats. With Empire, dreams becomes reality!

“Inevitable evolution”

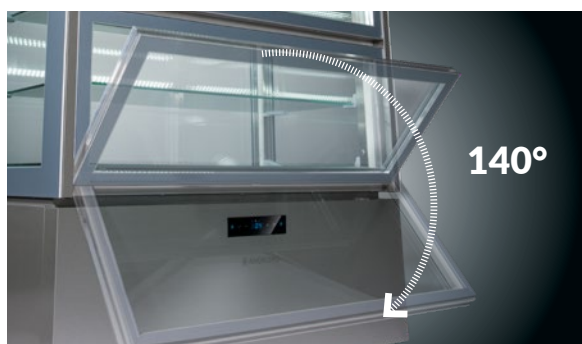

DISPLAY THAT ADAPTS TO EVERY NEED

Attractive design and extraordinary versatility make it special, unique in the world of upright refrigerated display units.

Available in two models, free-standing and built-in, elegantly meets contemporary needs in terms of furnishing and consumer products.

Thanks to its display case, entirely in tempered glass with external screen-silk printing, innovative shelf holder system and LED lighting, Empire Double is an expression of light and maximum content visibility. The sophisticated superbly designed structure and dimensions allow for display with total confidence, optimising the space available!

The tempered double-glazed flap doors are driven by the Softmotion system which reduces energy consumption, increases the flexibility of use and allows the best possible display.
