- Software constantly adjusts to market to be the most profitable

Usability

- Easy to install and set up
- Free software
- Available on Windows, MacOS and Linux
- Machine performance unaffected
- Detailed statistics

Join our mission to raise \$1bn for good causes

How Much Can You Earn?

Every supporter's computer can create an income stream for their chosen charity. A typical home computer can raise £5-£20 a month - powerful computers could generate much more. The cost is a few pennies in electricity each day.

The amount your supporters can raise each month varies and depends on:

The amount of computer power they have

The amount of time their computer is plugged in and active

The current market price of digital currencies - like the stock market this price goes up and down

Computer Capabilities Guide:

Basic Desktop

£5 - £20

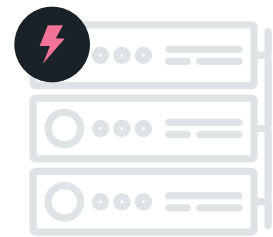

Advanced Laptop

£5 - £30

Advanced Desktop

£25 - £75

Server

£50 - £150

"We're delighted to be partnering with Cudo Donate to offer our supporters a new way to make a difference. Just by installing this software, your computer's unused power can make a valuable ongoing contribution to our cause. This is a great new way to support the vital work we do to save lives, where seconds can mean the difference between life and death."

Andy Williamson

CEO | *Children's Air Ambulance*
