

PRODUCT SPECIFICATION

Detachable IEM Cable | PN: 7140857 | NASTECH

DESCRIPTION:

The Arete Series MKIII Cable is made of premium grade multi-stranded OCC Copper conductor. Combined with elastic insulation material, Arete series cable offers the most flexible (when select with Nylon sleeve) earphone cable solution on market. The cable itself is quad braided to reduce low range distortion and interference for max performance and offers dynamic and euphonic sound presentation. This cable carries very little memory effect nor microphonics with extreme comfort and mobile/outdoor usage.

FEATURES:

- OCC casted 7N copper conductors.
- 48 strands per wire, 192 strands per cable
- Maximum tensile strength and flexibility with reduced microphonics.
- Ultra clear and durable TPE insulator providing extra layer of protection from oxidation, more resistant against sweat/skin oil.
- Support dual mode inline remote, compatible with both iOS and mainstream Android devices.
- Electroplated copper IEM connector (for 2PIN/MMCX), Y-Splitter, 3.5/2.5mm connectors.
- Support customization for wide range of earphone connectors.
- Support 3 colors: crimson red, electric blue and smoked black (mixture of 2 colors are available)
- Default ear guide for comfortable wearing.
- Nylon sleeve to provide extra protection (optional).

SPECS:

- Cable weight 26 g ± 3 g (subject to connector type)
- Main wire diameter Ø3.0mm (Split wire: Ø2.0mm)
- Cable Length 1.2M (48"), custom length supported
