

Power Polishing

Preamble:

The following information is intended only as a guide to better understand the various steps involved in paint correction and determine the level of service that suits your needs and budget.

Baseline Scenario

The chart below is intended to represent the estimated time and cost associated with each activity assuming the vehicle is a sedan/small SUV that is a daily driver and a few years old. The actual amount of time required to correct a vehicle using these steps will vary depending on the age, size, condition, type of paint and colour of vehicle (black and red vehicles commonly take a little longer to obtain quality results).

Note: Full restoration projects can take multiple days to achieve optimal results.

Service Chart

Activity	Description	Estimated Time (hrs)	Rate (\$)	Total (\$)
Paint Preparation				
Regular Wash	Remove surface dirt (shampoo/foam and pressure wash) and dry	0.5	50	25
Strip Wash	Apply degreaser to remove soap residue, existing waxes or sealants	0.5	50	25
Chemical Decontamination	Apply products to dissolve embedded particles (iron, brake dust) and rinse off	0.5	50	25
Mechanical Decontamination	Clay bar treatment (sap, tar, industrial fallout). Removes bonded contaminants and leaves a completely smooth panel improving multi-stage polishing and protection results.	1	50	50
TOTAL		2.5		125
Polishing Preparation				
Protect trim and badges	Tape off trim, weather stripping and badges	1	75	75
Wet Sanding (Colour Sanding) Spot treatment only	Level paint, blend scratches/etching, remove heavy oxidation	1	75	75
TOTAL		2		150

Power Polishing

All-in-One Power Polishing

All-in-One (Single Stage)	Intended for removal of light scratches and swirls, applies a glaze to fill minor imperfections and leaves a thin wax protection. Budget friendly and recommended for your daily driver. Excellent option as an annual maintenance service.	3	75	225
TOTAL		3		225

Multi-Stage (Cut/Polish/Protect)

To remove scratches, swirls, holograms, pig tails, oxidation

Stage 1 - Cut/Compound	Remove moderate-heavy paint imperfections	6	75	450
Stage 2 - Polish	Remove light-moderate scratches or swirls. To enhance gloss and depth of paint. May include application of a glaze to help fill minor imperfections before applying protection.	2	75	150
Stage 3 - Protect	Apply wax / paint sealant and buff to high shine	2	75	150
TOTAL		10		750

Related Services

Additional services such as decal or badge removal may be requested/required at an additional cost of \$75/hr. The time required to complete this service will be dependent on the amount of work required and price estimated upon inspection of the vehicle or review of photos provided by the customer.

All prices subject to GST.
