

Pacific Bioethics – Capability Statement (California)

Overview

Pacific Bioethics provides applied clinical ethics consulting, education, and policy advisory services to California government healthcare systems, including correctional facilities, state hospitals, and veterans' homes. We help agencies strengthen ethical decision-making, support staff through complex moral and clinical challenges, and promote dignity, accountability, and quality of care across diverse patient populations.

Core Competencies

Clinical Ethics Consultation & Advisory

- Case review and consultation on high-risk, capacity, and end-of-life decisions
- Development and mentoring of institutional ethics committees
- Integration of ethical frameworks into patient care, quality, and safety initiatives
- Organizational ethics support for correctional and behavioral health systems

Ethics Education & Staff Development

- Professional ethics and boundaries training for clinicians and custody staff
- Communication, informed consent, and confidentiality training
- Moral distress mitigation and resilience programs for healthcare teams

Policy & Systems Support

- Development and revision of clinical ethics policies and procedures
- Alignment of ethics practices with state, federal, and accreditation standards
- Institutional culture and patient rights consulting for secure-care settings

Differentiators

- Certified **Healthcare Ethics Consultant (HEC-C)** with academic and clinical expertise
- **Harvard Medical School Center for Bioethics Fellow**; advanced NIH/HHS ethics training
- Dual background as **Associate Professor of Medical Ethics & Professionalism** and **former U.S. Navy medical service member**
- Unique blend of academic, military, and consulting experience applied to **federal and state healthcare, education, and research systems**
- **SBA-Certified Veteran-Owned Small Business (VOSB)**
- **Minority-owned, Certified California Micro-Business**

Past Performance (Relevant Experience)

- Provided instruction in behavioral sciences, medical ethics, and clinical professionalism to diverse student populations
- Advised international medical schools on accreditation and compliance with U.S. and international standards
- Completed advanced ethics training with Harvard, NIH, and HHS
- Completed FEMA emergency management courses, including hurricane preparedness and incident command
- Served in the **U.S. Navy** at Camp Pendleton Naval Hospital and aboard **USS Berkeley DDG-15**, medical department
