No Farmers No Food

We'll have to start a blockade
Because politicians are too afraid
To give up their limo motorcade

A war we didn't ask for
War what is it good for
The whole world suffers

No farmers no food
Stalin Starved 30 million to death
That's as many as all of us in Australia

Politicians have caused crisis after crisis
The record of history clearly shows
Millions starved to death

If farmers are denied diesel
Many will go bankrupt
Their farms sold

Is this Australia
Is this why migrants came here
To live under deliberate domestic terrorism

If we remember what it is
To be True Blue Austrlains and stand with our farmers
We may just have saved ourselves from a great famin

Change my mind

Wolf of Dalby
