UPFRONT INCOME VERIFICATION

Please be advised that the Mansfield Housing Authority has been using the EIV (Enterprise Income Verification), System since November 1, 2005.

EIV is done by computer matching with federal, state, and local government and or private agencies verifying wages, new hire information, unemployment compensation and social benefits.

This will eliminate some of the need for written third party verifications.

This information will be kept strictly confidential between the individual to whom the record pertains. PHA's may not disclose (or re-disclose) EVI data to any third parties.
