Mr. Steven A. Zecola:
President and CEO
GO Communications Corporation
201 N. Union Street, Suite 410
Alexandria, VA 22314-2642

Dear Steve-san:

Thank you very much for your kind letter of April 19. I have been aware of what was going on with the auction and I would have reached the same decision as you and other shareholders. It was a real pity that the valuable spectrums were auctioned in such a manner.

In spite of all, however, I was very much impressed with the endeavor and very high professionalism of you and GO's management team. Mitsubishi's executives share my opinion and nobody ever said a word of regret for having participated in the auction as a business partner with you.

I am now managing a task force to study the feasibility of introducing multi-channel digital TV services via satellite in Japan. It is very stressful to work among big Japanese players after 5 years and a half of absence. I believe that we will have another chance to meet with each other, and who knows that we will not have another opportunity to work together.

I sincerely wish your great success in the next business opportunity and please also give my best regards to our common friends at GO!.

Yours sincerely,

Masahiro Yamate
