

Drillo Bonanza Indonesia Company Profile

May 2024

drillo

Who Are We?

We are an independent consultant that provides clients with focused advice and solutions. Primarily in the earth resource industries.

We provide mining projects with services ranging from exploration to mine closure. In disciplines including due diligence, technical studies, mining waste and management, permits, and mine rehabilitation, our personnel are experts.

Our consultants use their significant expertise and experience to develop new ideas and practical strategies that match the particular demands and financial objectives of their clients.

Meet Our Experts

Dedy Hendrawan

**Project Manager / CPI Exploration
and Resource Estimation KCMi**

An expert with 32 years of geologist experience in Indonesia and Australia, with an outstanding track record in developing mine projects from scratch to valuable mine. Various commodities include gold-copper to nickel, iron, lead and zinc.

Nayarudin Nofiya Rahmat

**Senior Geologist/ CPI Exploration
KCMi**

Experienced in the mining sector for around 20 years in gold deposit exploration, especially for epithermal, sediment hosted (carlin-type), skarn, greisen and porphyry. Organizing and executing a number of regional and detailed exploration programs in various regions in Indonesia,

Abdul Riyansyah

**Senior Resource Geologist/ CP
Mineral Resource Estimation SNI**

Twelve years of experiences as a geologist, particularly in porphyry and skarn copper-gold-iron deposit. Good ability in broad range of skills which required in mining industry such as geostatistics, geotechnical engineering, and geometallurgy

Subehan Achmad

Senior Geologist

An expert with 25 years of geologist experience in Indonesia. Geologist with expertise in managing and directing geological exploration programs, overseeing drilling initiatives, and ensuring compliance with industry codes.

Meet Our Experts

Luthian Azmi Ibadi
Exploration Geologist

A highly motivated and diligent individual actively seeking new experiences, I possess a natural curiosity and a passion for continuous learning. My serious and conscientious work ethic enables me to excel both as a collaborative team member and a capable team leader.

Cristian Jeraldo
Associate Geometallurgist

Cristian Jeraldo, 20+ years of experience in Canada, France, Indonesia, Brazil, Peru, and Chile; both in consulting work and in operations. Specialized in Mineral Resources estimation, project valuation, geometallurgical modelling, mineral exploration, sampling protocols and QA/QC.

Elka Mustika
Database Geologist

A passionate geologist with competencies in database, data analytics, and statistics. Phyton and SQL are mastered.

Agile in project management-controlling and client relation.

... and some passionate geologists & engineers

Drillo collaborates with dozen of passionate and dedicated engineers and geologists to work on site or in office to deliver high standard work result for our clients.

Our Services

Consulting

Consultants focus on maximising the value of the geology function and mineral resources to your company through industry-leading estimates, independent audit and review, clear, unbiased reporting, and superior geological services throughout the exploration and mining.

Data Digitalization

Build a winning digital strategy and stay ahead of the fast-moving digital landscape with DrilloDig's cutting edge foresight tool and expert services. Giving advantage to your company's most valuable asset.

Data Science

Consultants focus on maximising the value of the geology function and mineral resources to your company through industry-leading estimates, independent audit and review, clear, unbiased reporting, and superior geological services throughout the exploration and mining.

Training

Drillo training course adopts a geology data-based learning approach, in which delegates are presented with a series of real numerical geology data analysis problems drawn from the widest possible range of applications – from geology to big data to reporting.

Geological Consultants

Geology & Exploration

The exploration services we provide include target generation, field mapping and analysis, geophysics, geochemistry, mineral system modelling, exploration project management, audits and valuations, exploration strategy and governmental advice. Our geologists have expert knowledge of the mechanisms of orebody formation and distribution within a wide range of geological settings.

Mining Studies

Drillo personnel has experiences in covering all exploration to mine development reporting, including Government-compliance documents such as **KCMI/JORC report**, **RKAB ESDM**, and **Feasibility Study**. Not only for gold commodity, we are also exposed to iron ore, copper, silver, and nickel.

Mining Business Advisory

We are a counseling business, specifically in mining industries, that helps its clients grow their company by advising them on identifying their potential and surmounting limitations in defined areas. We provide technical services and resources to assist your mining businesses. It consists of tailored mining to business planning, advisory boards, structure, funding, and business strategy.
