- Track comment threads for multiple projects
- Send change notices, PO's and floorplans
- Reduce mistakes and stay on budget
- Save storage space on your phone

A Data Collection and Collaboration SaaS Platform

For the home improvement industry

A Data Collection and Collaboration SaaS Platform

For the home improvement industry

This tool is amazing. The fact that I can send what I am doing from the field to my phone and then email everything to my guys is why I love the 3Dazer.

ANTHONY GUISO

SMART PROJECTS WITH A SMART APP

MEASURE

Quickly and accurately measure and calculate distance, area and volume

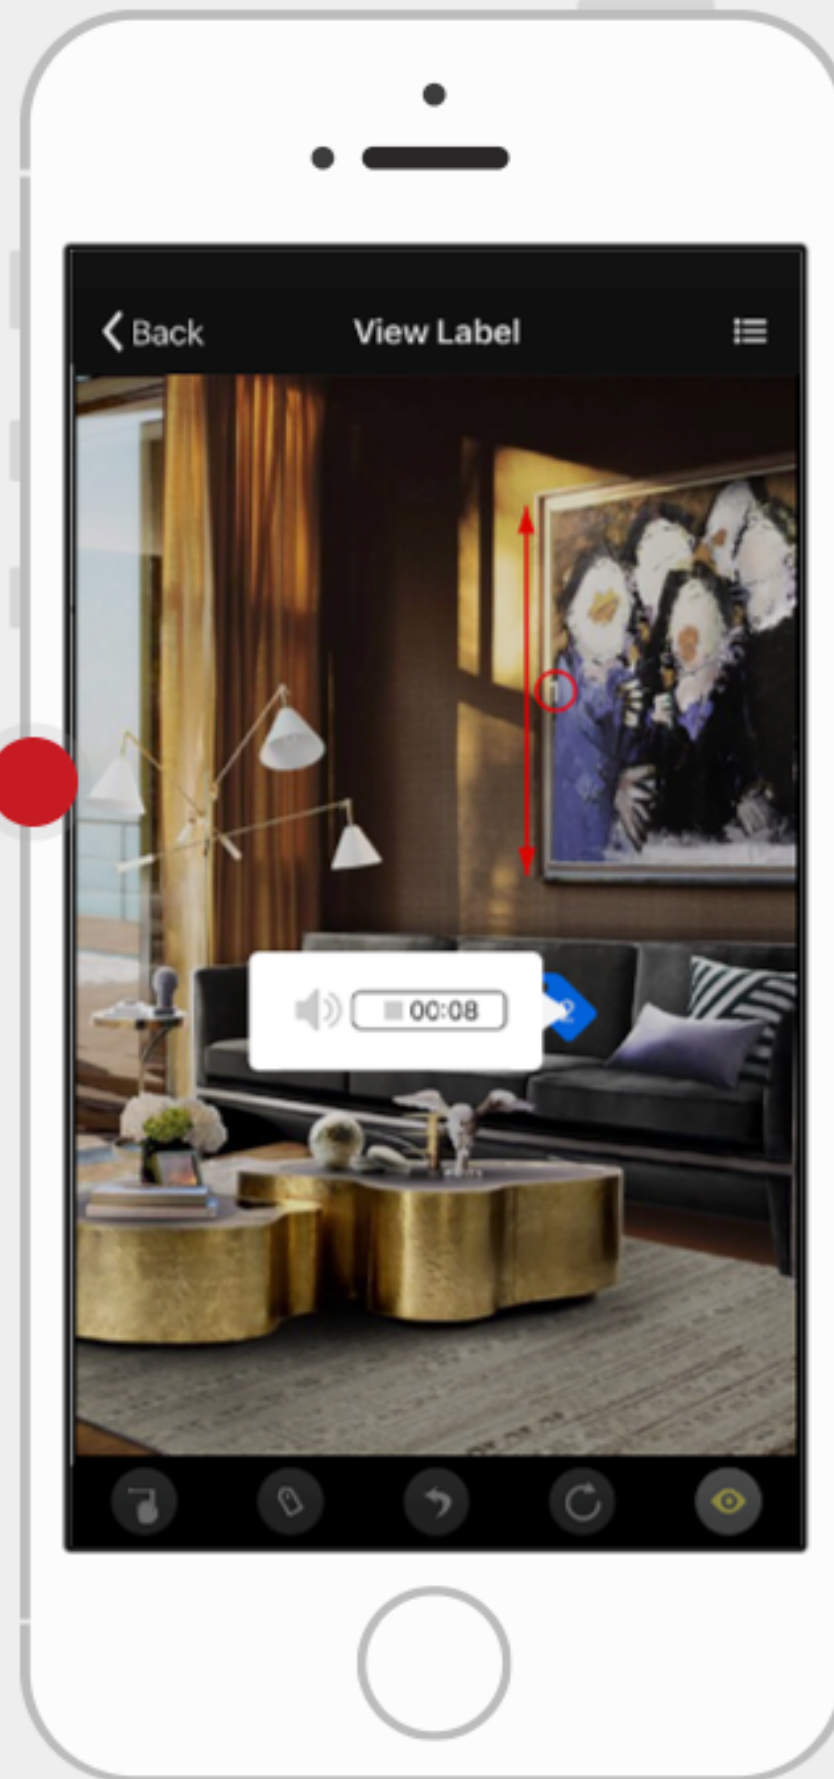

LABEL

Take photos and add notes and voice memos for handy reference

COLLABORATE

Work more efficiently by sharing with co-workers

STORE

Upload and save to your own secure cloud account for anytime access

SKETCH

Create on-the-spot floorplans right on your mobile device

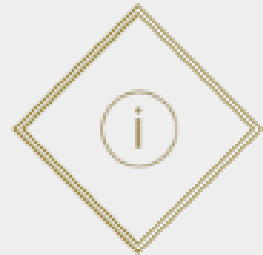

EASY TO READ

Easily view measuring results and project data on your phone screen

BID JOBS QUICKER

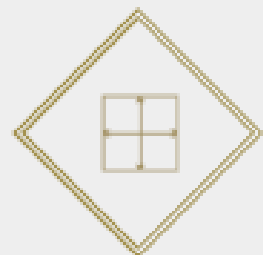

CLIENT INFO

Keep each client's details organized for quick and easy reference

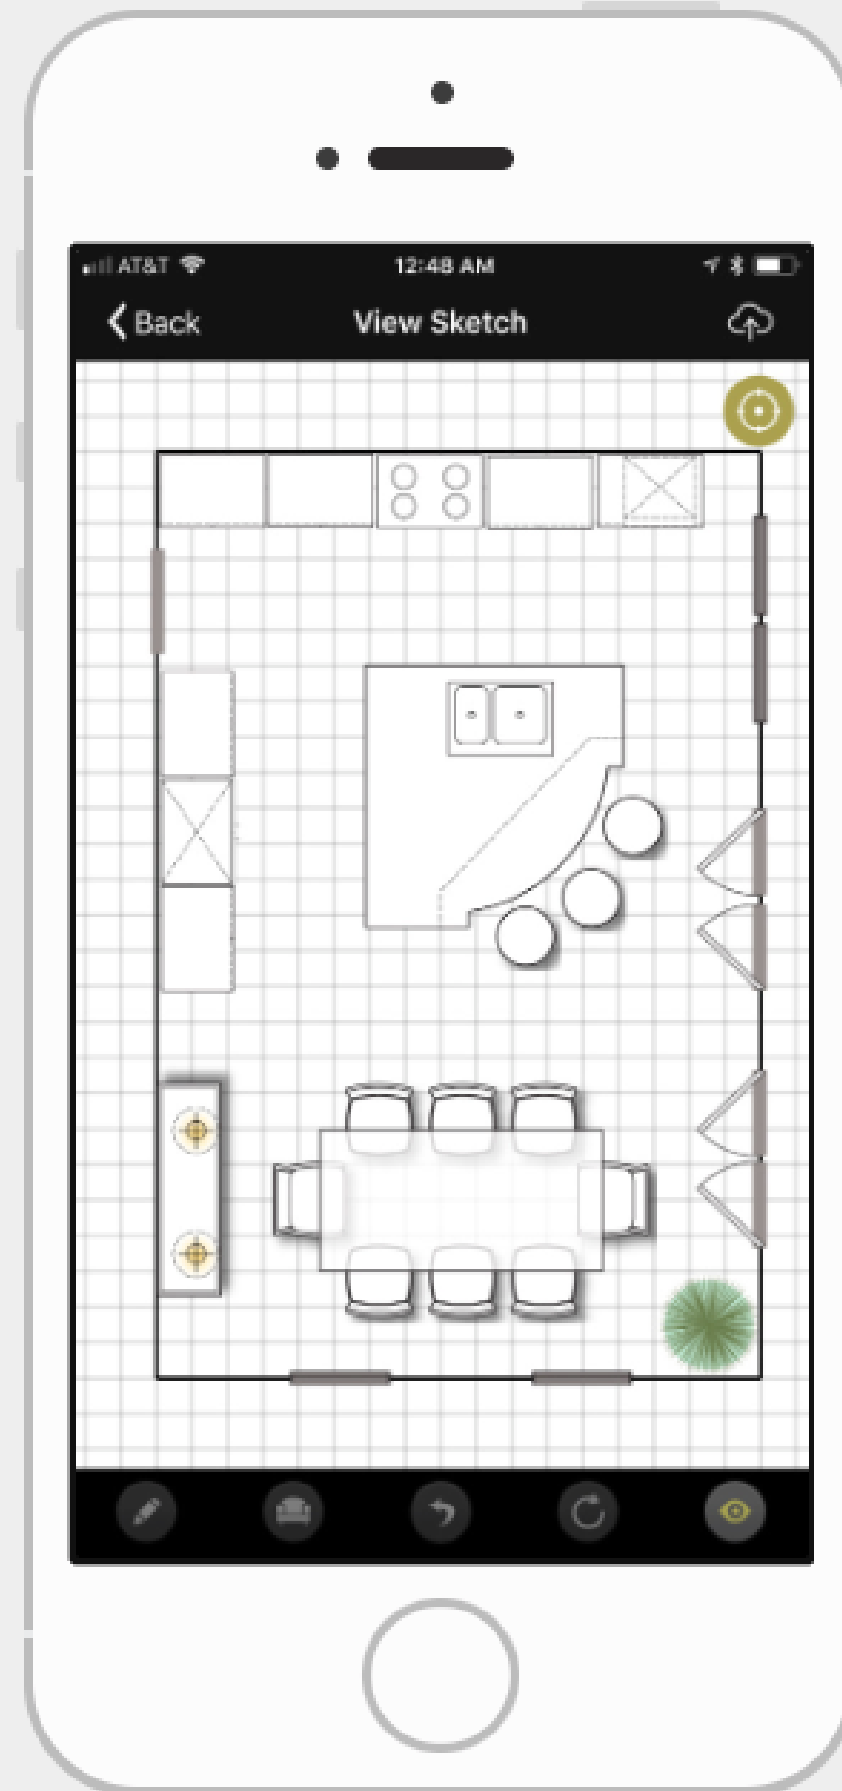

BID REQUESTS

Gather project specs with photos, notes, lists and measurements for more accurate bids

Vendor Connections

I'm a Permit Planner and I help Realtors and homeowners expedite permit solutions with various governmental departments and agencies in my area. We couldn't believe how easy and useful the 3Dazer was when working on our projects and with our drafter.

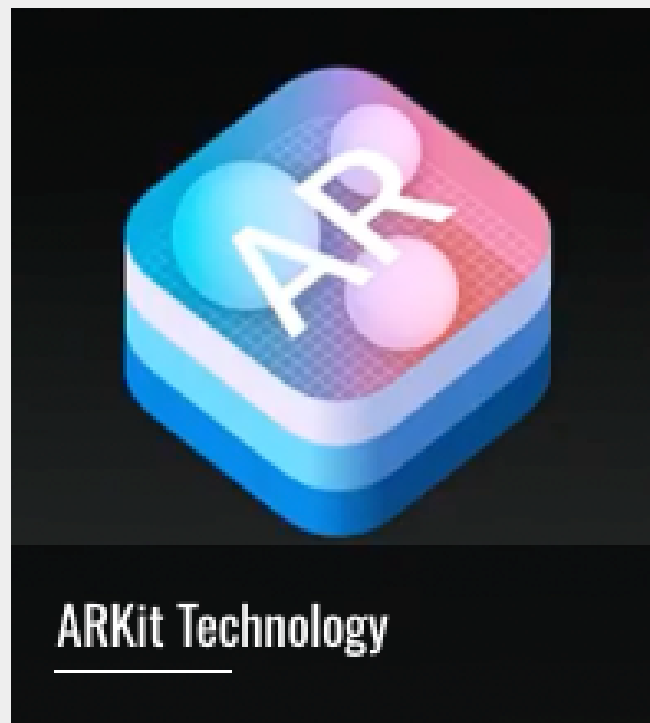

It keeps us organized.

ABOUT US

3Dazer is a hybrid project management app and precision measurement tool that is useful for the fast-paced home improvement industry. Using Apple's ARKit technology that revolutionized the smartphone, and cloud storage, we provide a project management app for home improvement pros that offer solutions to critical job site challenges customized with trade-specific add-ons on a handheld platform tailored to meet the home professional's needs. The 3Dazer project management app provides streamlined access to organized project data and promotes collaboration to get the job done on time and on budget.

3Dazer has features that go well-beyond a simple "point and shoot" laser measuring tool by establishing a project management solution to take the professional beyond the measurement stage and now offers an Android version as well.

3DAZER DISRUPTS THE HOME IMPROVEMENT MARKETPLACE

NEWPORT BEACH, CA - May 8, 2018 - 3Dazer (www.3Dazer.com), owned by Laurel At Sunset Inc. announced today, the official launch of their one-of-a-kind laser distance measuring solution that attaches to your smartphone and syncs with a project management app (available in the App Store and

CONSTRUCTION EXECUTIVE: CONSTRUCTION TECHNOLOGY AND SOFTWARE RUNDOWN

A big thank you to Construction Executive for writing about 3Dazer. Construction Executive is the magazine for the business of construction. It reaches more than 53,000 contractors and construction-related business owners and has won more than 20 editorial awards. Since first being published by Associated Builders and Contractors Services Corp. in 2003, the magazine has served as the leading source for news, market developments and business issues impacting the construction industry.

BLOG: BUSINESS EFFICIENCY FOR THE PROJECT MANAGER ON-THE-GO

Bringing new technology into your business can do increase productivity, boost sales, and just make your company run more efficient. But bringing new technology into your business doesn't have to be a complicated process, and it shouldn't. So, what can you do to make a technology change more appealing and the transition easier when it comes to those subcontractors who feel it may be above their head? Show them how it is done by integrating them in the process as you begin using it yourself.

BLOG: HEY! GENERAL CONTRACTORS: HOW TO GET MORE BIDS EACH WEEK

It's generally accepted within the construction market that the best way to submit a construction project bid is to provide the most accurate quote and then deliver the lowest possible bid based upon that cost estimate. But in a competitive environment, general contractors win only 1 out of 6 bids and subcontractors only 1 out of 7 bids using this tactic. For some contractors, bid win rate is as low as 1 out of every 35. No wonder construction pros often claim they can't win bids in such a competitive environment, grumble that they're tired of cutting bids to beat the competition, or worry they simply can't make enough money to survive.

VIDEO: BIDDING SIMPLIFIED WITH 3DAZER PRO

Make the bidding process faster, easier, and more accurate and efficient with the help of the 3Dazer Pro project manager and laser measurer!
