

Looking for Lower Heating /Cooling Costs in 2025?

"Fox Hill Indoor Air Quality Services"

Poor Indoor Air Quality is Serious

Americans, on average, spend

90% of their time indoors

where the concentrations of some
**pollutants, VOC, CO2, PM2.5, are
often 2 to 5 times higher** than
typical outdoor concentrations. *
Causing poor health and sleep
problems.

How do we know that **DUCTS LEAK?**

25-40%

of conditioned air
(hot/cold) leaks out
of the ductwork!

In houses with forced-air heating and cooling systems, ducts are used to distribute conditioned air throughout the house. But in typical houses, about 25-40% of the air that

moves through the duct system is lost due to leaks, holes, and poorly connected ducts. The result is higher utility bills and difficulty keeping the house comfortable, no matter how the thermostat is set.
