

# Pilgrim Village Angler Diary

Please record information about your fishing trips to help us better manage the stocking of Lake Taylor.

- Once you have caught a fish, determine the species and record its length and whether you kept or released it.
- Please document your fishing experience even if you don't catch any fish. If no fish are caught, record a zero (0) under the species of fish you were hoping to catch.
- If you ever observe a winter or summer fish-kill, please notify the Lake Study Director immediately.
- Please use the "Comment" section below to share your fishing goals, observations of the minnow population, and any additional thoughts.
- Please provide photographs of any remarkable or unusual catches.
