

## GET READY TO RETHINK PATIENT RECOVERY.

Reparel™ offers a new and innovative patient-care solution that's proven effective and affordable - to accelerate the healing process. **This is NOT compression. And NOT a brace.** Reparel products act like **medicine you can wear** - reducing patient pain and resolving inflammation in the body.

This trailblazing technology gives patients a more comfortable alternative to what they're used to - with a quicker recovery, and host of auxiliary benefits.

### HOW REPAREL™ WORKS.

It's not magic, but new technology that is supported by the scientific community and endorsed by physicians and patients.

Reparel's intelligent fabric absorbs the body's radiant energy and reflects energy back as photonic, near-infrared light waves, that cause photostimulation. Reparel reflects at the therapeutic window wavelength of 600-1300 nanometers. This process maximizes cell stimulation, improves cell function, and accelerates body repair and healing.

### NOW, REIMAGINE THE NATURAL HEALING PROCESS.

The body's initial inflammatory response can often be prolonged with the use of common anti-inflammatories designed to treat the symptoms, but at the expense of a patient's overall recovery. Reparel ensures that injuries progress through all stage of healing - inflammation, proliferation, and remodeling.

Reparel facilitates the three stages of healing by increasing blood flow to injured tissue and assisting in clearing out damaged tissue from the injury site.

## **INCREASE PATIENT OUTCOMES & SATISFACTION - AND IMPROVE YOUR BOTTOM LINE.**

Reparel is committed giving you the superior product quality and design that enable your patients to recover at an accelerated pace with maximum comfort. Our products are only available through medical professionals and on our website, giving you exclusivity with an opportunity to earn substantial revenue for your practice.

- It is important to note that all Reparel products are covered under worker's compensation claims [A4467].
- Billing for Reparel PDAC-approved undersleeves is applied in combination with bracing through insurance [L2397] when purchased together with ROM braces, ligament braces, and unloaders. They are also billable to insurance with the pneumatic walking boot.
- Patient-friendly pricing makes Reparel an even more attractive alternative for patients.
