

REFLECT THE MOON

By Carbon Harry

I'm passing Neptune
Far past the moon,
I need some space here,
Here in my room,
No one can stop me,
From seeing stars,
I keep on asking,
Is there life on Mars?

I am here in my space station,
Floating through the constellations,

Now, let your eyes reflect the moon,
Now, let your eyes reflect the moon,

Oohs,

I just love Saturn,
With all its rings,
Andromeda,
I hope she sings,
Ursa Minor and Gemini,
Everything I love,
Beyond the sky,

I am here in my space station,
Floating through the constellations,

Now, let your eyes reflect the moon,
Now, let your eyes reflect the moon,

Oohs,
