

## **GRAVITY FALLS DOWN**

By: Carbon Harry

Ring around the Rosie and we all fall down  
Humpty Dumpty knows it all falls down

The London bridge you know it all falls down  
Even the tallest trees they all fall down

I try to fly away  
And I am gonna find a way

That's when Gravity, takes ahold of me,  
I try to reach the moon but then I fall into the sea

That's when gravity grabs everything I see  
And pulls us all together and that's where we were supposed to be

The food in the snack machine it all falls down  
Even the base players they all fall down

All the notes I play they all fall down  
All the snow flakes you know they all fall down

I try to fly away  
And I am gonna find a way

That's when Gravity, takes ahold of me,  
I try to reach the moon but then I fall into the sea

That's when gravity grabs everything I see  
And pulls us all together and that's where we were supposed to be

Ring around the Rosie and we all fall down  
Humpty Dumpty knows it all falls down

The London bridge you know it all falls down  
Even the tallest trees they all fall down

I try to fly away  
And I am gonna find a way

That's when Gravity, takes ahold of me,  
I try to reach the moon but then I fall into the sea

That's when gravity grabs everything I see  
And pulls us all together and that's where we were supposed to be
