

Construction Project in Your Area

San Antonio Water System is holding a community meeting to discuss the Blanco Rd. Pressure Zone 1111 Water Main Project.

September 3, 2024

Harberger Park Urban Ecology Center

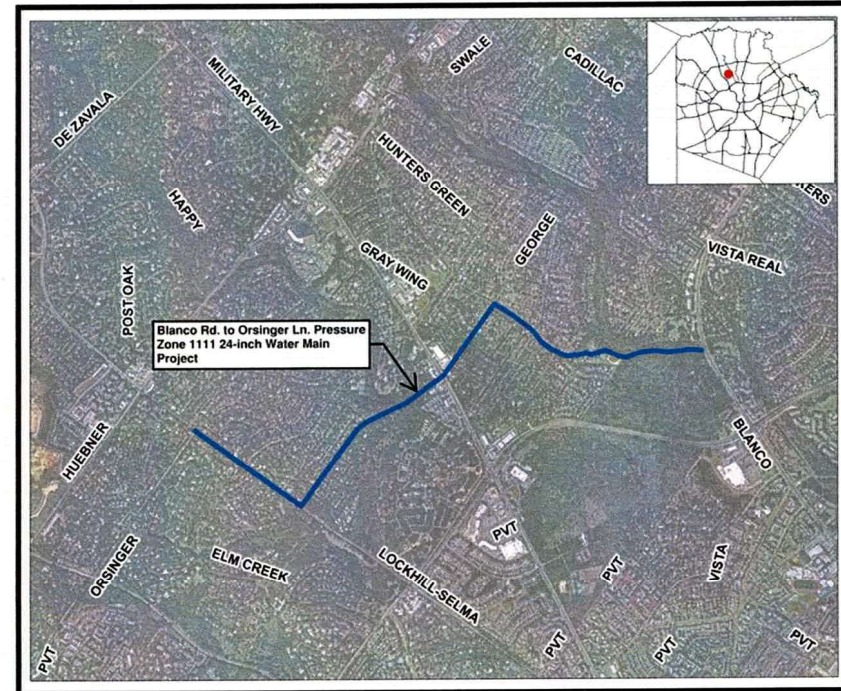

8400 NW Military Hwy

6:00 pm

The Blanco Rd Water Main Project consists of the installation of approximately 2.6 miles of 24-inch water main along Lockhill-Selma from Orsinger Rd. to George Rd., along George Rd. from Lockhill-Selma to Shady Walk Dr. drainage channel, and along the drainage channel through to the Phil Harberger Park Conservancy and Voelcker Homestead. The project is required to improve transmission efficiency between the Bitters booster station and the DeZavala elevated tank.

Project Construction is anticipated to begin in the 4th quarter of 2024 or the first quarter of 2025 with a project duration of approximately 24 months.

While construction will be carried out by an independent contractor, SAWS inspectors will regularly visit the site to ensure progress and compliance with all regulations and codes. Residents will be notified prior to any disruption to the water or sewer service and these should be minimal.

For questions regarding this project, please contact Byron Gipson at 210-233-2977 or Byron.gipson@saws.org
